

Craftsmanship, Art & Technology

The representation of

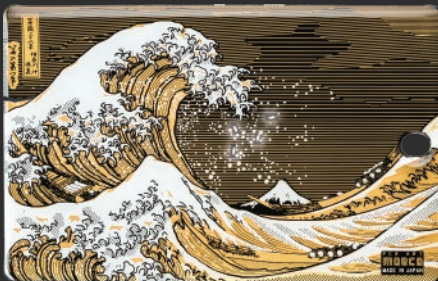

“The Great Wave off Kanagawa”

by Katsushika Hokusai in great detail on the circuit board

iPhone case and IC card case with flashing
non battery powered LED

(Patent Pending)

※Application image of the back side with IC card

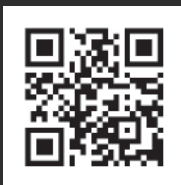

※It's sometimes hard to react at the ticket gate by direction of insertion.(Please change the direction of insertion and try it again.)

The red LED flashes with the iPhone signal that is transduced and with increased voltage. The 4 white LEDs mounted where sea spray flash when you tap the train ticket gate.

Our business is printed circuit board (PCB) manufacturing and PCB assembly, mainly for industrial machines and social-infrastructure control device for over forty years. “Made in Japan” PCB ART moeco products are created by the same process (designing with PCB CAD, manufacturing PCB, assembling real parts). PCB=Printed circuit board

Flashing Non-Electric Source LED Series (All prices are without TAX)

- ① iPhone X/XS case 13,000yen
- ② iPhone XR case 14,000yen
- ③ iPhone XS Max case 14,000yen
- ④ iPhone 7/8 case 13,000yen
- ⑤ iPhone 7/8Plus case 14,000yen
- ⑥ iPhone SE/5/5s case 13,000yen
- ⑦ IC card case (with key ring) 9,000yen
